## ABSTRACT

Since passage of Ohio's Public Employee Collective Bargaining Act of 1984, Ohio public employees have voted to join unions in more than 70% of elections, and 90,584 Ohio public employees gained union representation from 1984 to 1992. Before the establishment of Ohio's multitiered collective bargaining process, which involves intervention by a mediator and fact-finder, Ohio averaged 61 public sector strikes yearly. Since collective bargaining, that figure has decreased to 12.7. Nearly half the strikes of the past 10 years have involved teachers. Between one-third and one-half of Ohio's 612 school districts engage in collective bargaining each year, and 96.3% of all negotiations involving teachers have ended in an agreement without a strike. Those teacher strikes that have taken place have lasted an average of 9.9 days (approximately 5% of a total school year's instructional time). Teacher strikes have not been shown to have any perceptible impact on student achievement in Ohio; rather, the derivative impact of the higher teacher salaries and lower pupil-to-teacher ratios achieved through collective bargaining has likely enhanced student achievement. (Twenty tables and a 22-item bibliography are included. Appended are tables of data about Ohio public sectors strikes in the years 1984 through 1993.) (MN)

## INTRODUCTION

There have been several landmarks in establishing the democratic rights of workers to organize and bargain collectively in the United States. The Railway Labor Act of 1926 affirmed the right of railroad employees to organize unions without coercion and outlawed company unions on the railroads. The National Labor Relations Act or the Wagner Act of 1935 established the fundamental right for workers to join unions of their own choosing and engage in collective bargaining. The Wagner Act established the National Labor Relations Board to oversee representation elections and to enforce the rights of workers and their unions.

The legal right of public employees to bargain collectively through a union of their own choosing has generally lagged behind the rights of employees in the private sector. Congress approved the right of postal workers to form unions in 1912. A half century would pass, however, before most employees of the federal government could legally join unions. In 1962 John F. Kennedy issued Executive Order 10988 which established the right of federal workers to organize unions and engage in collective bargaining. Under this decree, federal workers needed 60 percent approval to win a representation election and were not permitted the right to strike. In 1970 Richard Nixon issued Executive Order 11941 establishing binding arbitration to solve impasse situations for federal employees, but they still were denied the right to strike.

In Ohio, the rights of public workers have been an issue for the past fifty years. The Ohio legislature passed the Ferguson Act in 1947 prohibiting strikes against public authority. The Ferguson Act dealt only with strikes and imposed severe penalties. A public worker could be dismissed for joining a strike. If rehired, a public employee could not enjoy any wage increase that might have been achieved, but had to work at his or her previous wage. Finally, any public employee rehired after strike activity was placed on probation for two years. The Ohio Supreme Court also ruled in 1947 that a city could not agree to deduct dues from union

members (eventually overturned in 1959). That same year, State Senator Howard Metzenbaum introduced a bill to allow collective bargaining for Ohio's public workers. It never received a hearing. It would be nearly forty years before public employees in Ohio achieved that fundamental right. In 1967, collective bargaining bills were introduced in both the Ohio House and Senate, but neither reached the floor as non-AFL-CIO unions supported the senate version and AFL-CIO unions supported the House bill. In 1975, State Senator Harry Meshel introduced SB 70 which passed both houses, but was vetoed by Republican Governor James Rhodes. Two years later Meshel introduced a similar bill which again got through the legislature, but was again vetoed by Rhodes. The Senate overrode that veto, but the bill never reached the House floor for an override vote.

Despite these setbacks, the tide was turning. The Ohio Supreme Court upheld local government and public employee collective bargaining in 1975. An Ohio Attorney General's opinion granted similar rights to county employees in 1980. Public employees in Ohio finally gained the full right to collective bargaining in 1983. Senator Eugene Branstool introduced SB 133, which passed both houses and was signed into law by Governor Richard Celeste on July 6, 1983. The law's major provisions took effect April 1, 1984.

The Public Employee Collective Bargaining Act of 1984 regulates virtually all aspects of labor relations in the public sector in Ohio. All Ohio public employers (with few exceptions, such as villages with a population of less than 5000) are under the law's jurisdiction. The Collective Bargaining Act established the State Employment Relations Board (SERB). The three member SERB and its administrative staff act as a neutral, quasi-judicial board. SERB regulates three primary areas of labor-management relations: representation elections; collective bargaining during contract negotiations; and adjudication of unfair labor practices.

### Representation in the Private and Public Sectors

Throughout the United States, significant unionization of the private sector preceded union representation for public employees. As the size and importance of the public sector has grown, the legal rights of public workers have gradually been established at the national, state and local levels. Representation for public workers jumped significantly in 1962 when John F. Kennedy issued Executive Order 10988 establishing the right of federal workers to organize. Since then most states have followed suit and allow some form of collective bargaining for public employees. Public sector representation rates grew steadily until the mid-1970s and have remained remarkably stable in the past twenty years. Today, the representation rates for public employees triples the percentage of private sector workers that are unionized. Public employee unions are now the most dynamic force in the American labor movement.

## REPRESENTATION ELECTIONS

SERB determines the composition of bargaining units, conducts elections, and certifies unions if victorious. A public employer is the state or any political subdivision of the state, such as school districts, universities, state agencies, authorities, and commissions, counties and municipalities. Employees can demonstrate majority support for a union by submitting a request for recognition with SERB or by petitioning SERB for a representation election. If employees submit a request for recognition and can provide substantial evidence that a majority wishes to join a specific union and they are not challenged by their employer, SERB may recognize the union as the exclusive representative. Otherwise, at least 30 percent of the employees in an unrepresented unit must express interest in representation (sign cards) and petition SERB for a representation election.

After SERB has determined the bargaining unit, it issues a Notice of Election which the employer must post no later than ten days before an election. Elections are by secret ballot and conducted by SERB agents. Employees may vote for any employee organization which has qualified for the ballot or for no representative. A ballot choice must win by a simple majority. In a tie between the union and no representation, no representation wins. In an election with three or more ballot choices, in which no choice receives greater than 50 percent, SERB holds a runoff election between the top two vote-getting choices. Any objections to the conduct of an election must be filed within ten days of the tally of ballots. If enough ballots are challenged to affect an election result, SERB may dismiss the objections, direct a recount of some or all of the challenged ballots, or set aside the election and direct a rerun election. After the election, SERB will issue a certification of the election. If the union prevails, it will be certified as the exclusive bargaining agent for the employees. SERB may also certify a union if it determines a free election is impossible because of an employers unfair labor practices in a unit that once had majority support for the union.

### Representation Summaries

In the private sector, 93 percent of certification elections involve AFL-CIO affiliates. There are many more independent unions in the public sector (especially teachers unions). AFL-CIO unions are on the ballot in only about 60 percent of public sector representation elections. The most active unions in organizing public employees are AFSCME, NEA, AFT, IBT, SEIU, CWA, FOP, IAF, IUOE, IBEW, LIUNA, and the USWA.

Ohio already had a history of strong unionization in certain sectors of public employment, such as municipal governments and school districts, before the collective bargaining law. Teachers associations, for example, were often in place before they gained official status as certified unions. The largest unorganized groups of public employees were in state and county governments. In the first few years after the law took effect there was a burst of voluntary recognitions and certification elections. The greatest gains in representation came in sectors that were only lightly unionized before the law. The law had much less impact on heavily unionized sectors.

Ohio public employees have voted overwhelmingly to join unions in representation elections since the collective bargaining law of 1983. Public employees have chosen to join a union in greater than 70 percent of the elections. 90,584 Ohio workers gained representation through certification elections or card checks (requests for recognition) from 1984 to 1992.

Public workers in Ohio rarely choose to lose representation once it has been achieved.

Only 1,413 workers lost representation to "no representative." There is, however, a strong demand for responsive union leadership and democratic principles in public sector unions.

9,740 Ohio public employees switched from one union to another in challenge elections in these years.

## Representation Elections

	1993	1992	1991	1990	1989	1988	1987	1986	1985	1984	Total

## COLLECTIVE BARGAINING

### **Bureau of Mediation**

Collective bargaining for Ohio's public employees is a several tiered process. A party who wishes to begin negotiations (employer or employee organization) files a Notice to Negotiate with SERB. The time period for negotiation is 60 days (90 days for an initial agreement). SERB appoints a mediator 45 days before the end of the negotiating period if no agreement has been reached. SERB then appoints a fact-finder 30 days before the end of the negotiating period if an agreement still has not been reached. The fact-finder has 14 days to issue a report with a recommendation on each disputed issue. The parties may continue to negotiate and reach an agreement during this time. If they have not reached an agreement, the parties have seven days to vote on the report as a whole. If both parties accept the report, an agreement is reached. A three-fifths majority is needed by either party to reject the report. If SERB does not receive a rejection vote within seven days, the Board deems that the report has been accepted.

If either party rejects the report, the employer may implement its own terms of an agreement and the employee organization may strike after giving 10-days notice to SERB. If the bargaining unit is forbidden to strike, the remaining disputed issues are submitted to conciliation, binding arbitration. The arbitrator's decision is final.

By mutual agreement, the parties may adopt alternative dispute settlement procedures (MADs) which supercede the above procedures.

## COLLECTIVE BARGAINING

### **Bureau of Mediation**

**NOTICE TO NEGOTIATE**  
(initiates a 60 day negotiating period)

**MEDIATOR APPOINTED**  
(45 days left to resolve disputes)

**FACT-FINDER APPOINTED**  
( 30 days left to resolve disputes)  
(parties continue to negotiate as fact-finder prepares report)

**FACT-FINDER ISSUES REPORT**  
(16 days left to resolve disputes)  
(parties have seven days to accept or reject report)  
(report may be deemed accepted if no 3/5 rejection vote is received by SERB)

**NOTICE OF INTENT TO STRIKE OR CONCILIATION**  
(employee organization must give 10-days notice to SERB before a strike)  
(employees not permitted to strike submit to binding arbitration)

## Mediation

The second main function of the State Employment Relations Board is to facilitate collective bargaining. The collective bargaining process under SERB has been remarkably stable with very little strike activity. The mediation, fact finding, and conciliation process overseen by SERB in Ohio's public sector collective bargaining has been criticized, however, as producing a "narcotic effect." The narcotic effect is the frequent and continued use of statutory dispute resolution mechanisms, that is, instead of significant negotiation between the interested parties there is an overreliance on a neutral party (in this case SERB) to impose a settlement. Studies on Ohio's safety forces, prohibited from striking, seem to show a strong narcotic effect in Ohio. However, the stable and effective functioning of Ohio's public sector bargaining calls into to question whether the narcotic effect is necessarily a bad development.

## Strikes

Before collective bargaining, from 1978 to 1980, Ohio averaged 61 public sector strikes per year. The penalties mandated by the Ferguson Act were typically not enforced by struck employers. Many employers thought enforcement would sour relations with their employees and do more harm than good. Furthermore, the procedure for replacing employees was expensive.

Since collective bargaining was established in 1984, Ohio has averaged only 12.7 strikes per year. Safety forces, including police, firefighters, and emergency medical service personnel, are prohibited from striking and submit to conciliation (binding arbitration). Almost precisely half of the strikes in the ten years since the law took effect involved teachers. These teacher strikes, however, have had no meaningful impact on student achievement. The state requires school districts to meet all the education requirements for a 182-day school year in order to be eligible for any state aid. This provides a strong incentive to bargain. Of the 612 school districts in Ohio, about one-third to one-half engage in collective bargaining in any one year. 96.3 percent of all negotiations involving teachers succeeded before a strike occurred between the 1984-85 and 1991-1992 school years. Only 2.5 to 3.7 percent of the districts involved in negotiations in an average year were unable to conclude an agreement without a strike. The teacher strikes that did take place lasted an average of only 9.9 days or about 5 percent of the total school year's instructional time. Overall, in collective bargaining for teachers during these years, less than .07 percent of total instructional time available was lost due to teacher strikes. Teacher strikes appear to have no perceptible impact on student achievement. If anything, the derivative impact of higher teacher salaries and a lower pupil to teacher ratio achieved through collective bargaining has enhanced student achievement.

## UNFAIR LABOR PRACTICES

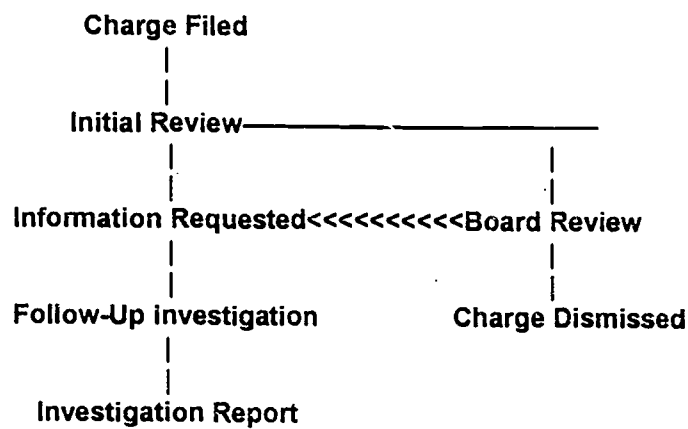

SERB's third major function is to prevent or remedy unfair labor practices. The Ohio Revised Code defines certain actions as unfair labor practices (ULPs). These include interfering with employee rights; refusal to bargain; obstructing grievance processing and fair representation; unlawful lockouts, strikes, and picketing; and causing an unfair labor practice. A charge may be filed by or against an employer, employee, or union within 90 days of the last occurrence of the alleged ULP. The Investigation Phase determines whether or not an ULP has been committed. When a charge is filed, the staff in SERB's Investigation Section conduct an initial review to determine if the charge is an ULP. If they find no ULP has occurred, they submit a report to the Board. The Board may dismiss the charge or return the case to the Investigation Section for further study. If the case passes the initial review or the Board rules a ULP has occurred, each party submits information. The Investigation Section presents a report to the Board for review.

During the Determination Phase, the Board may dismiss the charge or find probable cause, in which case an ULP complaint is issued. The charged party must admit, deny, or explain each charge in writing. A Board member or hearing officer then conducts an evidentiary hearing and issues a decision and recommended order. Any party may file an exception disagreeing with the decision within twenty days. If substantial exceptions are filed, the Board may change or rescind the proposed decision and recommended order.

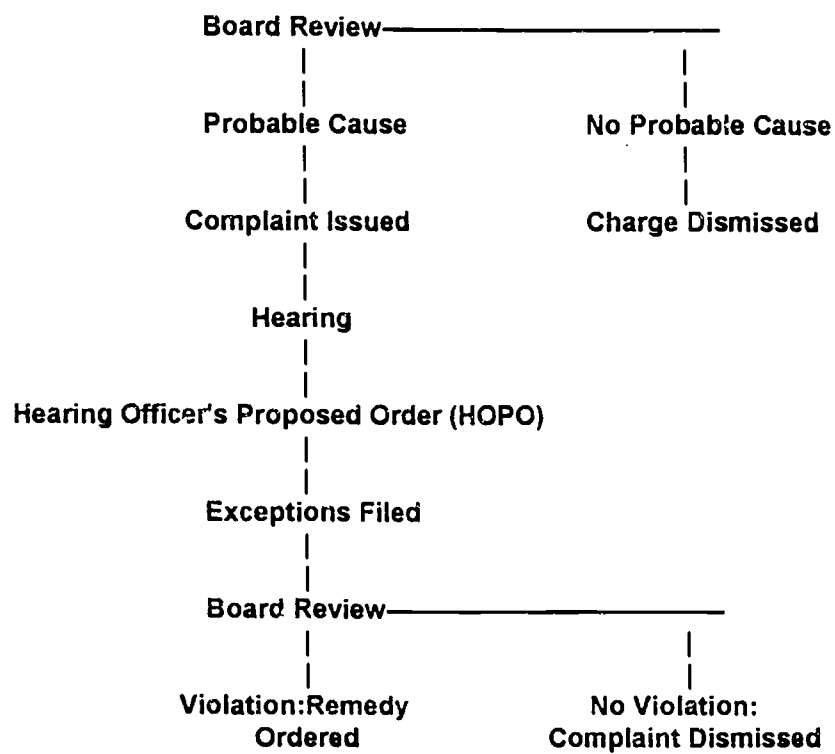

If the Board finds no violation has occurred, the complaint is dismissed. The Board imposes a remedy if an unfair labor practice has occurred.

## GLOSSARY OF TERMS

SERB's current case typing system uses these designations:

<b>EORC</b>	Employee Organization Reporting Complaint
<b>JWD</b>	Jurisdictional Work Dispute
<b>MED</b>	Mediation
<b>RBT</b>	Fair Share Rebate Determination
<b>REP</b>	Representation
<b>RLX</b>	Religious Exemption
<b>STK</b>	Employer's Request for Determination of Unauthorized Strike
<b>ULP</b>	Unfair Labor Practice

(SERB used different case designations before January 1, 1987.)

The following abbreviations are in common administrative use:

<b>HOPO</b>	Hearing Officer's Proposed Order (recommendation in a ULP complaint case)
<b>HORD</b>	Hearing Officer's Recommended Determination (recommendation in a non-ULP case)
<b>MAD</b>	Mutually Agreed Alternate Dispute Resolution Procedure (negotiations procedure adopted by the parties which supercedes the statutory procedure)
